¼-Inch Pistol Grip Drills

Powerful — Compact — Lightweight — for easy, one-hand use

Feature by feature, these Millers Falls pistol-grip drills represent exceptional values. Light (only 3 lbs.) — compact (only 8½" overall) — and beautifully balanced, they're a real pleasure to use. The palm-fitting grip is the most comfortable we've ever seen. The straight-line trigger switch can be locked for continuous use and automatically released at a touch of the trigger. Powerful, too — these new-drills are conservatively rated at 1.7 amperes — ample power for drilling up to ¼" in steel — up to 3/4" in wood. They're sturdily built and nicely finished in hammer-tone gray enamel. Electrically and mechanically, they offer outstanding value, service and dependability.

MOTOR: Universal for DC or AC 25, 60 cycles

VOLTAGES: 115 or 230 volt

HOUSING: Die cast aluminum

Gears: Alloy steel, grease lubricated

SWITCH: Single pole, with lock and automatic trigger release

BEARINGS: Ball thrust spindle. Others oil impregnated bronze.

CORD: 7 feet of three-conductor, type SJ, with moulded reinforcement and plug.

	Capacity in Steel	Chuck	R.P.M.	Amperes Full Load	Length Overall	Weight	Price

New "Dyno-Mite" Power Wood Bits

High-speed steel blades even cut through wire nails without damage. Here are the most efficient tools ever developed for boring holes up to 1" diameter in wood, plastics and similar materials with power drills and drill presses. "Dyno-Mite" bits give you all the advantages of the modern flat-blade design which is rapidly replacing conventional auger bits. In addition they have high-speed steel blades which bore clean and fast in either cross or end grain — that readily even at angles — are not affected by drilling heat that would draw temper of ordinary toolsteel bits — stay sharp 10 times longer.

Depth of Cut — 5"

Overall length — 6½"

No. 2135

Right-Angle Drive

A handy attachment for ⅜" electric drills, permitting operation in close quarters where drill cannot be used direct . . . in corners, between studs, etc. No adaptor is required. Gear ratio is 1 to 1. Solid steel gears, self-lubricating bronze bearings. Side handle is reversible.

No. 2130 — for ⅜" drills with "Geared Key" or "Hex Key" chucks threaded ⅜" — 24 and with ⅛" or longer spindles. This includes Millers Falls No. 814 and No. 914.

No. 2135 — for ¼" drills with spindles threaded ⅜" — 24 and 36" or more long. This includes Millers Falls No. 814 and No. 914. Weight 1 lb. Packed 1 drive in a box.

New Jig-Saw Attachment

Fits any ¼" drill. An extremely versatile and useful tool for sawing intricate patterns in brackets, valances and other decorative or odd shapes in wood — or weather vanes, house signs, etc., in sheet metal. Requires no starting hole as wood cuts its own way through.

No. 2140 — Attachment with 4 saw blades. Capacity ¾" in wood, ¼" in metal. Weight 1½ lbs. Packed 1 in a box.

No. 2140

MILLERS FALLS
TOOLS

SINCE
1868

The Art of Working

Still going strong after boring through 15 ft. of hard maple, 180 screws, 376 wire nail. That's the record of a single "Dyno-Mite" bit used to prepare demonstration blocks like this.

Cut easily,
smoothly through
hard or soft wood,
plywood, plastic,
etc.

"Impossible
Spots" are easy
to reach with
Right-Angle Drive
in your ¼" drill.

No. 2120

Buffing and Sanding Attachment

Makes any ¼" electric drill an efficient power buffer-sander. Two speeds — 1 to 2 and 2 to 1 drill speed. Sturdy and smooth-running. Grease-sealed lubrication. Machine-cut steel gears. Convenient 105° angle drive allows clearance for drill and cord on tight work.

No. 2120 — Attachment complete with 5" Rubber Pad, two 5" Sanding Discs, and 3" Lomb's Wool Bonnet. Weight 2½ lbs.

No. 2121 — Extra 3" Lomb's Wool Bonnet.

No. 2122 — Extra 5" Sanding Disc 3½" or 102 Grit.

No. 2123 — ½-in. Drill Chuck for use on No. 2120 attachment. Permits drilling in corners and other places difficult to reach with drill alone.

New 888 Power Unit

The Start of a Complete Power Workshop

Here's one of the greatest time and work savers ever invented! Just as it comes, the 888 Power Unit is three tools in one—powerful $\frac{3}{8}$ -inch drill, a 6-inch portable disc sander, and a 6-inch polisher. Add its amazing assortment of beautifully engineered, economically priced attachments to make a *very complete power workshop*—all for a small fraction of the cost of individually powered tools to perform the same work.

888 Power Unit Is Built For Performance. In every detail, this great new tool is designed to give outstanding performance. For instance, all attachments are driven directly from the spindle (the chuck is used for drilling only). Thus the load is kept close to the bearings—wear and vibration are minimized. The rugged Universal AC-DC motor carries a *full 4.0 amp. rating*. Other features include: N.L. Speed of 3200 r.p.m., . . . drilling capacity $\frac{3}{8}$ " diameter in metal—1" diameter in wood.

MOTOR: Universal for DC or AC 25/60 cycles

VOLTAGES: 115 or 230 volt

GEARS, PINION AND SPINDLE: Spindle $\frac{3}{8}$ "-24T thread. Finest hardened alloy steel. Spindle nut designed to take sanding discs with either $\frac{3}{8}$ " or $\frac{5}{8}$ " holes.

SWITCH: Fully enclosed trigger with lock and automatic release

CHUCK: $\frac{3}{8}$ " Jacobs Geared Key

BEARINGS: Ball thrust spindle. Others oversize self-oiling, bronze sleeve throughout.

BRUSHES: Long life pignail. Accessible from without.

EQUIPMENT: One 6" Lamb's Wool Bonnet, one each coarse, medium and fine Sanding Disc, one 6" Rubber Pad with conical lock nut. Reversible side handle. Spindle Arbor for wheels with $\frac{1}{2}$ " holes, 7 feet of three-conductor cord. Type S-1, with moulded reinforcement and plug.

General-Purpose Bench Power Unit
For driving wire brushes,
buffers, grinding
wheels, etc.

Rugged Attachments for the No. 888 Power

No. 881

No. 881 Bench Stand

Solidly bolted or screwed down, this sturdy, cast-iron base converts the No. 888 into a rugged general-purpose bench power unit, providing steady drive for wire brush, buffing or grinding wheels with $\frac{1}{2}$ " holes. The base is also used for operating the No. 889 Disc Sander, the No. 8810 Bench Grinder, and the No. 887 Bench Jig Saw attachment.

	Base	Weight	Price
No. 881	$3\frac{1}{2}$ " x 5"	2 $\frac{1}{2}$ lbs.	

Packed 1 in a box

No. 882

No. 882 Orbital Sander

This attachment is mounted and locked directly on the spindle and spindle housing of the No. 888 Power Unit. It transforms rotary motion into orbital motion at the rubber-backed sanding shoe. Used with standard abrasive sheets cut in thirds, it produces an extremely smooth surface on wood or metal for applying fine, high lustre finishes. A "must" for good cabinet work.

	Size Shoe	Weight	Price
No. 882	$3\frac{1}{2}$ " x $7\frac{1}{2}$ "	1 $\frac{1}{2}$ lbs.	

Packed 1 in a box

No. 883

No. 883 6-Inch Bench Saw

Driven by the powerful No. 888 Power Unit, this extremely useful saw performs wonderfully. Depth of cut is quickly and easily adjustable from 0" up to a capacity of $1\frac{1}{8}$ ". The big table is $12\frac{1}{4}$ " wide, 13" deep and $9\frac{1}{8}$ " high, with a full 6" in front of the saw. Comes complete with graduated cut-off and mitering gauge, self-aligning rip fence, and high-quality 6" combination blade.

Table width can be increased to $18\frac{1}{4}$ " by adding No. 884 Extensions (extra). The saw is completely guarded below the table and self-elevating No. 885 Saw Guard can be added (extra) for greater safety.

	Saw	Table	Weight	Price
No. 883	6"	$12\frac{1}{4}$ " x 13"	25 $\frac{1}{2}$ lbs.	

Packed 1 in heavy carton. Shipping Weight, 23 lbs.

No. 884 Saw Table Extensions

Rugged, well-designed extensions, 3" wide x 13" long, bolt to either side of the No. 883 Saw Table for greater working surface when desired. Packed 1 pair in a box. Weight 3 lbs. Per pair

No. 885 Saw Guard

A highly desirable, self-elevating fixture to protect the operator from that portion of the blade which extends above the table top of the No. 883 Saw. Guard is made of substantial steel stampings and is quickly and firmly mounted on the table with the two screws provided. Packed 1 in a box. Weight $\frac{1}{2}$ lb.

No. 8812 Sanding Guide

There are many free-hand disc sanding operations where it is highly desirable to have positive control of the angle of cut in order to prevent gouging and scoring. This attachment provides such control — fastens directly to the housing of the No. 888 Power Unit at any desired angle. Packed 1 in a box. Weight $\frac{1}{2}$ lb.

Accessories and Supplies

- A NO. 9386 HIGH-SPEED TWIST DRILLS SET. 13 sizes from $1\frac{1}{2}$ to 16 by $\frac{1}{64}$. High-speed steel. For use in steel, iron, hardwood, plastic, etc.
- B NO. 23107 DRILL HOLDER. 13 numbered holes for drill set above.
- C NO. 9667 BUFFING WHEEL. For cleaning and polishing silver, copper, brass and other metals. Made of fine quality cotton. $3\frac{1}{2}$ " x $1\frac{1}{2}$ " diameter.
- D NO. 9668 SANDING DISCS. High-grade $\frac{1}{2}$ " Aluminum Oxide disc. Three grits available — coarse, medium and fine. Packed 6 discs in polyethylene envelope — either assorted grits or all the same.
- E NO. 9669 LAMIN'S WOOL BONNET. High grade, genuine lamb's wool for polishing and waxing. Fibrously spun rubber pad, $8\frac{1}{2}$ " diameter.
- F NO. 23004 WIRE BRUSH WHEEL. Medium wire for general polishing and cleaning. $4\frac{1}{2}$ " diameter.
- G NO. 9634 CUP WIRE BRUSH. Useful for cleaning and brushing loose surfaces difficult to reach with regular wire brush. $2\frac{1}{2}$ " diameter.
- H NO. 9674 POWER AUTO-POLISH. Liquid and removes film and dirt like magic. And smooth on surfaces. Polish with lamb's wool bonnet on the 888 Power Unit. per can
- I NO. 9671 PAINT STRIPER. Carefully shaped for maximum striking efficiency without splashing or spilling. fits cans of paint or larger sizes.

Unit that make a complete Power Workshop

No. 886 Jig Saw

An extremely versatile and useful tool for sawing out intricate patterns in wood or metal. Ideal for making brackets, valances, weather vanes, house signs, and other decorative or odd shapes. No starting hole is required in wood — it cuts its own way through.

Attachment clamps directly onto spindle housing of the No. 888 Power Unit and is direct-driven from the spindle by the collar provided. Four fine-quality blades are supplied — two for wood and two for metal.

	Capacity	Weight	Price
No. 886	Wood $\frac{3}{4}$ " Metal $\frac{1}{8}$ "	1 $\frac{1}{2}$ lbs.	

Packed 1 in a box

10/15/2

No. 887

No. 887 Jig Saw Table

Projects such as puzzles, monograms and intricate designs can be cut out easier and better when the No. 886 Jig Saw is set up as a bench unit. Such a unit is quickly made by attaching this table to the shoe of the No. 886 Jig Saw and locking the complete assembly in the No. 881 Stand. Note that the jig saw is attached at right angle to the handle on the nose of the No. 888 Power Unit so that the table is parallel to the bench.

The table is a heavy steel stamping 8" by 8" square.

	Size	Weight	Price
No. 887	8" x 8"	1 $\frac{1}{2}$ lbs.	

Packed 1 in a box

10/15/6 2/5/1

No. 8810 4-Inch Bench Grinder

Converts the No. 888 Power Unit into a handy, smooth operating bench grinder with wheel well-guarded for safety. Also provides a work rest that is adjustable for both angle and diameter of wheel.

The cast-iron guard clamps directly to the spindle housing of the No. 888 Power Unit. The grinding wheel is 4" medium grit with $\frac{1}{2}$ " face and hole. It is mounted on the arbor supplied, which screws directly on the spindle of the No. 888 after it has been clamped into the No. 881 Stand.

No. 8810

	Wheel Diam.	Weight	Price
No. 8810	4"	2 $\frac{1}{2}$ lbs.	

Packed 1 in a box

10/15/6

No. 889

No. 889 6-Inch Disc Bench Sander

Does a fine job of wood sanding or metal polishing at angles and even compound angles. Table is $5\frac{1}{8}$ " x 8", with $3\frac{3}{4}$ " directly in front of the disc. A graduated angle gauge is provided and the entire table can be tilted to 45°. An adjusting screw is also supplied to correct the normal 90° table-to-disc angle.

The 6" disc is driven directly off the spindle of the No. 888 Power Unit after it has been mounted in the No. 881 Stand. The Sander table and frame bolt directly to the end of the stand.

	Disc	Table	Weight	Price
No. 889	6"	$5\frac{1}{8}$ " x 8"	3 $\frac{1}{2}$ lbs.	

Packed 1 in a box

10/15/6

No. 8811

No. 8811 6-Inch Portable Saw

This attachment makes one of the finest 6" portable saws you could ask for. The shoe is a rigid steel stamping 6" wide and $10\frac{1}{2}$ " long, with sturdy ripping guide. Depth of cut is adjustable from 0° to $1\frac{1}{8}$ " — enough to handle finished 2 x 4's. Angle adjustments from 90° to 45°. For safety a cast aluminum, telescoping saw guard is provided.

	Diam. Saw	Weight	Price

Portable Electric Saws

The light weight and perfect balance of these saws make them extremely easy to operate. They perform wonderfully and can be relied on for years of highly satisfactory use.

They are regularly equipped with a fine-quality combination saw blade, telescoping guard for maximum safety, heavy steel shoes with sturdy adjustments for angles and depth of cut, and a built-in ripping gauge. Air blast clearance of the cutting line is provided.

NEW NO. 600 6-INCH SAW. A powerful tool with maximum depth of cut of 1½" at right angle, enough to handle finished 2 x 4's and 1½" at mitre (45°). Gears are precision cut, helical, hardened alloy steel. Bearings are self-aligning, oil-impregnated bronze.

NO. 610 6-INCH HEAVY DUTY SAW. A fine rugged saw that is powerful enough and big enough to handle 90% of all sawing jobs commonly encountered. Maximum cut at right angle, 1¾"; at mitre (45°), 1¾". Gears are precision cut, helical, hardened alloy steel. Bearings are ball and self-lubricating bronze.

NO. 700 7-INCH SAW. A larger, heavier saw with capacity for cutting finished 2" lumber at right angle or mitre (45°). Maximum cut at right angle, 2¾"; at mitre, 1¾". Gears are precision cut, helical, hardened alloy steel. Bearings are ball and self-lubricating bronze.

MOTORS: Universal DC or AC 25/60 cycles

VOLTAGES: 115 or 230 volt

EQUIPMENT: No. 600 — 7 feet of three-wire rubber covered cord with moulded plug. Nos. 610 and 700 have 10 ft. cords. Wrench for changing blade is provided. Carrying case and extra blades available separately.
